# MB05200
# COMMUNITY HEALTH WORKER/ MOBILIZER

**Level 2**

## Reports to (Hierarchical)
IEC/ HP Supervisor

## Reports to (Functional)
IEC/ HP Supervisor

## Job Family
Medical

## Main Purpose
The Community mobilizer and CHW will provide information and health education messages at the community level, and will strengthen the link between the community and the **MSF** health structures.

## Accountabilities
- Collect and report (to IEC/HP Supervisor) specific information related to his/her community: perception of the sickness, food security, vaccination status of children, perception of the services, constraints and strengths, vulnerability, level of information, living conditions and risks related;
- Deliver information to his/her community on specific health topics and about MSF, the services it provides;
- Consolidate the link between his/her community and the MSF services; give advise how to better involve his/her community in the activities of awareness and prevention; indicate possible local actors or local NGOs and community project which could be involved in awareness activities at a local level;
- Support the mapping of the territory and population: schools, churches, villages, gathering points; support and facilitate relations with local authorities of his/her community, where requested by the IEC/HP Supervisor; support MSF in the defaulter tracing activities
- Report to HP Supervisor: activities, problems met, strengths and constraints;

## Education
- Literacy. It is necessary to follow an internal MSF training on health messages (or, if possible, Ministry of Health training).
- CHW training (done by MOH) will be an asset.

## Experience

- None is required
- Has to be someone very active and well accepted in the community,

## Languages

Local language and mission working language essential

## Knowledge

Essential basic mathematics and use of measuring equipment

## Competencies

- Commitment
- Flexibility
- Stress Management
- Results
- Teamwork
- Service
